

**J-RING APPARATUS**  
For Self-Compacting Concrete (SCC)  
Standard: EN 12350-12**Self Compacting Concrete**

Used to determine the passing ability of self-compacting concrete to flow through obstructions, tight openings and spaces between reinforcing bars without segregation or blocking. The time required (t500) for concrete to flow to a diameter of 500 mm is also measured.

**Technical Specifications :**

|              |                 |
|--------------|-----------------|
| Model Number | CL 4028 X / 001 |
|--------------|-----------------|

**Unit Consists Of :**

| Model Number           | Parts Description                 |
|------------------------|-----------------------------------|
| CL 4028 X / 001 - P001 | J-Ring Apparatus                  |
| CL 4013 X / 001 - P001 | Slump Cone                        |
| CL 4028 X / 001 - P002 | Base Plate 905 x 905 mm (S.Steel) |
