

AUTOMATIC DATA ACQUISITION UNIT FOR CONSOLIDATION APPARATUS (OEDOMETER)

Data Acquisition Unit

The revolutionized automatic data logger provides the ultimate convenience of data recording for consolidation tests. It replaces the conventional lengthy & dull human recording system, thus eliminating human error & the need to manually record at odd hours. The system can be connected easily to any consolidation apparatus & software is easy to operate even for beginners.

Features:

1. Support up to 8 channels of deformation gauge attached to consolidation apparatus with individual channel control.
2. Display real time graph plotting of Displacement vs Time.
3. Raw data collection is saved automatically.

Technical Specifications :

Model Number	CL 5044 X / DAU
